**Tacx** Are you looking for a bottle fully made of biodegradable materials? Then the Bio-Bottle of Tacx is a great choice. It stands out because the plastic of the bottle is biodegradable. Adding a small amount of bio-material changes the molecular structure so the material finally breaks up in biogas and biomass. This feeds the soil and it's completely absorbed by nature. The process of disintegration starts when the bottle ends up at a microbiological environment (compost heap, waste disposal).

### WHAT IS UVC GERMICIDAL LIGHT?

UVC wavelengths are between 250 and 280 nanometers, making them germicidal – meaning they are capable of inactivating microorganisms, such as bacteria, viruses and protozoa.

### HOW DOES UVC LIGHT WORK ?

The high energy from short wavelength UVC light damages the DNA of bacteria and viruses thereby preventing replication and ability to infect.

### OUR UVC DISINFECTION PRODUCT RANGE

All our UVC products are mercury free and hence environmental friendly. Our products have been tested to be effective in disinfecting 99.9% bacteria such as E. Coli and Staphylococcus.

# BIO BOTTLES MADE IN THE NETHERLANDS

# Tacx

BIO BOTTLES MADE IN THE NETHERLANDS

**Tacx** Are you looking for a bottle fully made of biodegradable materials? Then the Bio-Bottle of Tacx is a great choice. It stands out because the plastic of the bottle is biodegradable. Adding a small amount of bio-material changes the molecular structure so the material finally breaks up in biogas and biomass. This feeds the soil and it's completely absorbed by nature. The process of disintegration starts when the bottle ends up at a microbiological environment (compost heap, waste disposal).

## CUSTOMISED APPAREL

### Typical measurements:-

	Gulf/Asian Sizes			Europe Sizes		
	M	L	XL	M	L	XL
A	28	29	30	29	30	31
B	21	22	23	22	23	24
C	8	8.5	9	8.5	9	9.5

These measurements are for guidelines only. The actual measurements may vary slightly between garments as knit garments have internationally accepted higher tolerance values

### GSM or GMS ?

Most manufacturers confuse clients with this. GSM: Grammes per sq. meter is the wt. of the fabric in a square of 1 meter x 1 meter. it remains the same in all sizes. Hence the correct way to describe GMS: is the wt. in grammes per piece of the Tee/Polo And will always vary with each size.

Thus, completely misleading. We ALWAYS specify the GSM. So you are rest assured of what we offer.

### Heavier the better ?

Not necessarily. The quality of yarn will decide the quality and Price.

Super combed, combed, semi combed and carded: this is the quality of YARN in descending order.

We specify the yarn. So you are rest assured of what we offer.

### What more we can offer:

You Are Welcome To Send Your Design Ideas And Originals. We Will Reproduce It For You..!

UV protection fabrics are rated between UPF 25-39. Ultraviolet protection factor(UPF) measures blockage of UV-A and UV-B rays. A UPF rating of 25-39 means that our fabric allows 1/25th to 1/39th (2.56- 4%) of UV radiation that falls on the surface of the fabric to pass through it. Thus, 96-97.4% of UV rays are not allowed to reach your skin thereby protecting the skin from sunburn and long term skin damage.

"ORCA is found in Antarctica and Arctic oceans. Also called 'Killer Whales', it is the largest of the Dolphin family. They are beautiful, intelligent, fast, strong and yet the most social of all sea animals! They are said to have great tolerance in varying temperatures. That is the reason they enjoy world-wide distribution. Most interestingly, it's the only species in the world that has both the male and the female offspring stay with their mothers and immediate family forever...!"

These wonderful creatures have inspired us to bring to you exclusive polos. Their 'killer look', beauty, sheen and lustre is attributed to the MERCERIZING process. The premium cotton rich material makes it extremely comfortable in all climatic conditions. The collar, cuff in the birdie configuration sets new standards in their making. The bold loop stitches all over the hems and shoulder make them unique and yet resilient. Finally just as the ORCA, this polo will stay with you for long time to come.

Shouldn't then it be called the ORCA POLO?"

## Guilloché

The origins of this engraving procedure, developed in the 17th century, trace back to the classical jewellery industry. Otto Hutt is one of the few companies that still uses this sophisticated technique. Not only has Otto Hutt continued this precision process manually, but they've developed it even further, adding innovative CNC control.

### A Climate-Neutral Pens Factory in Germany

#### Climate-neutral company

To ensure sustainable development, an important aspect for us is to take a holistic view of the three components: economics, environment and society. In collaboration with Climate Partner, our site in Fischerbach is 100 % climate-neutral – this includes the processing of all uma pens. The unavoidable emissions are compensated through climate protection projects. We consciously focus on investing in our region. The forest protection project in Freiburg aims to protect our valuable rural environment.

Facts:

- Emissions of 2,636,777 kg CO<sub>2</sub> compensated to date
- 100 % climate-neutral processing in Fischerbach
- 25 product series manufactured, processed and delivered climate-neutrally

#### Climate-neutral product series from recycled PET

With the uma recycled PET PEN series, we created a solution to the current requirements of the market. The series offers the highest degree of sustainability. It is demonstrably certified and is the first European pen series made of recycled PET bottles. It was therefore self-evident that we would want to produce, process and transport this series completely climate-neutrally. The climate protection project that we support fights against the flood of plastic waste in our seas and perfectly completes the sustainability story of the uma recycled PET PEN series.

Facts:

- Emissions totalling 288,994 kg CO<sub>2</sub> compensated
- In addition to being climate-neutral, we ensure an upcycling process certified in accordance with the Global Recycled Standard.

# SANTHOME

SECURITY FOR YOU

### How the card holder protects?

The aluminium Cardprotector protects your most important plastic cards not only against bending and breaking, but also against malicious parties reading your RFID and NFC cards. RFID (Radio Frequency IDentification) cards contain a chip and an antenna for wireless communication. Examples of RFID cards include the Travel card, ID cards, the latest generation of credit cards and bank cards, as well as various access passes.

### Using the Cardprotector

The Cardprotector can hold a maximum of 7 cards. If only embossed cards are used, the capacity is 5 cards. Position the cards you use the most at the back or front and they will slide out sufficiently to be used. Slide out the cards with ONE movement of the slider on the side. The radio signal, although still greatly reduced, will now be sufficient for contact over a short distance. This means that you can use your RFID-NFC cards easily and securely. After use, slide your cards back into the Cardholder by pressing down on them lightly.

PRESENTING A WALLET

THAT PROTECTS AGAINST FRAUD IN THE NEW WI-FI ERA.

**RFID**   
**BLOCKING**

**How the card holder protects?**

The aluminium Cardprotector protects your most important plastic cards not only against bending and breaking, but also against malicious parties reading your RFID and NFC cards. RFID (Radio Frequency IDentification) cards contain a chip and an antenna for wireless communication. Examples of RFID cards include the Travel card, ID cards, the latest generation of credit cards and bank cards, as well as various access passes.

**Using the Cardprotector**

The Cardprotector can hold a maximum of 7 cards. If only embossed cards are used, the capacity is 5 cards. Position the cards you use the most at the back or front and they will slide out sufficiently to be used. Slide out the cards with ONE movement of the slider on the side. The radio signal, although still greatly reduced, will now be sufficient for contact over a short distance. This means that you can use your RFID-NFC cards easily and securely. After use, slide your cards back into the Cardholder by pressing down on them lightly.

# Sustainability and Transparency Organization and Certification

Textile Exchange is a global non-profit that works closely with members to drive industry transformation in preferred fibers, integrity and standards, and responsible supply networks.

The Global Recycled Standard (GRS) is an international, voluntary, full product standard that sets requirements for third-party certification of recycled content, chain of custody, social and environmental practices, and chemical restrictions.

The Recycled Claim Standard (RCS) is an international, voluntary standard that sets requirements for third party certification of recycled input and chain of custody. The goal of the RCS is to increase the use of recycled materials.

## THE IMPACT

### Recycling 1 Plastic Bottle\*

= CO2 reduction 25.2 g  
= fuel-savings 0.52 g  
= saving water 88.6 mL

### 1000 kgs Recycled PET

= 67,000 pcs bottles  
= CO2 reduction 4.2 tons  
= fuel-savings 36.4 kgs  
= saving water 6,200 L

\* Calculations based on 600 ml plastic bottle
